

## What is the “College Associates” Program?

The “College Associates” is a group of individuals and businesses that have a common interest in the continued excellence of the College of Arts and Sciences. The members recognize that without private sector support the College cannot have that extra margin that will allow it to continue to improve and serve the region through its academic programs in 17 different academic departments. Much of our excellence has come from the support of alumni, parents of students, friends of the University, businesses, and foundations. Our ability to best serve our students and the region oftentimes depends upon the success of the “College Associates” Program.
